

S&P 500 Financial Services Company

Introduction

This case study of an S&P 500 financial services company is based on an October 2019 survey of Prevalent customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

“We have risk reporting on time when we need to report to the authorities. Consistent reporting metrics is another key benefit.”

Challenges

The business challenges that led the profiled company to evaluate and ultimately select Prevalent:

- Top drivers for purchasing their Prevalent third-party risk management solution:
 - Compliance – reporting against specific regulatory or industry framework requirements
 - Stronger cybersecurity, to ensure that third parties do not introduce cyber risks that could negatively impact the business
 - Greater risk-based intelligence
- Challenges that deploying Prevalent solved for their organization:
 - A limited ability to continuously monitor vendors
 - A lack of guidance in addressing industry standards or third-party regulatory compliance requirements for cyber risk, InfoSec, or data privacy
 - An inconsistent methodology for vendor risk management

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size:
S&P 500

Industry:
Financial Services

Use Case

The key features and functionalities of Prevalent that the surveyed company uses:

- Regulations or industry frameworks they must regularly report against:
 - GDPR
 - HIPAA
 - ISO 27001
 - PCI

About Prevalent

Prevalent is helping global organizations manage and monitor the security threats and risks associated with third and fourth-party vendors.
